Origin Tray / Pedestal

Bismuth Collection by Bismuth NYC

Work At Hand is pleased to introduce The Bismuth Collection, a group of tables inspired by the fractal crystal transformation of the element Bismuth. This collection is designed together by furniture designer Bronsin Ablon and entrepreneur Jared Scheib through their creative partnership, Bismuth NYC.

The Origin Tray / Pedestal complements the Bismuth collection and can be paired with any table as a matching set. This catch-all is a sculptural tabletop object ready to elevate any surface. Flip the tray over to create a pedestal for displaying candles, relics, or other objects.

Made to order and fully customizable in Brooklyn, New York. Available in white oak or walnut.

Size
